The High Resolution Anoscopy Workshop is offered as an optional enhancement to the Comprehensive Colposcopy course or as a separate CME activity. Register for one or both courses on page 13.

Who should take this course?

This workshop is designed for licensed healthcare providers who have an interest in screening and treating patients for anal neoplasia.

Objectives

Upon completion of this workshop, participants will be able to:

- Understand the epidemiology of anal HPV infection, anal dysplasia, and anal cancer;
- Understand diagnostic procedures for anal dysplasia and anal cancer; and,
- Understand treatment options of anal dysplasia

Course Educational Methods

Lectures: The first day participants will attend a general session concluding with a faculty-led question and answer period.

Hands-On Practica: On day two the participants will move through a series of hands-on sessions using actual instruments and inanimate models.

Course Syllabus

A separate syllabus including lecture notes and hand-outs from the faculty will be provided for this course.

Continuing Medical Education Credits

Continuing Medical Education Credits are available for this workshop. Please see page one for details.
